

Assignment Principles of Communication

- 1) * There are many factors when it comes to communication and perception such as culture, way of communication, Empathy of perspective - taking.
* People from different backgrounds may interpret non-verbal cues differently. For example, a gesture or a facial expression that is considered polite in one culture might be perceived as rude in another. Being aware of these differences helps avoid misunderstanding.
- 2) The cross-cultural etiquette that we can use are as follows:-
 1. Active Listening: Encourage employees to actively listen and seek to understand each other's perspectives before responding. This helps avoid misinterpretation and ensures everyone feels heard.
 2. Cultural Sensitivity Training: Offer training programs that educate employees about different cultural norms and communication styles.
 3. Use Plain Language: Avoid jargon or idiomatic expressions that might not be understood universally.

3. Five common semantic or language barriers to communication in an organization:

1) Ambiguity in language: when words or phrases have multiple meanings, it can lead to confusion.

2) Jargon & technical language: It becomes very problematic when using industry-specific jargon or technical terms that others may not be understanding and can create a barrier.

* And other factors are cultural differences, language proficiency, euphemism and politically correct language.

4. My experience:-

I had an interview with the students of "VIT Bhopal", who were part of the "Team Avatar". The students interviewed me for joining their team and also evaluated my skills. I was very much surprised in myself that I could communicate comfortably in English with seniors and also, there wasn't very much barriers in our conversation.

5. Non-Verbal Communication:-

* It refers to the conveyance of information, thoughts, and emotions without using spoken or written words. Non-verbal cues plays a significant role in interpersonal interactions, influencing how messages are interpreted ^{perceived} ~~interpreted~~ interactions influencing how and relationships are penkraft formed.
