UNIT III

Interpersonal Relationships: Interpersonal Relationships, Johari window, Empathy, Social Responsibility, Handling Tough Conversations, Responding to Anger, Support and Negotiation, Team Integration. **Decision Making:** Reality Testing, Problem Solving, Impulse.

Interpersonal Relationships

- ❖ Interpersonal relationships refer to social and emotional interactions between two or more individuals in an environment
- ❖ Interpersonal relationship is defined as a close association between individuals who share common interest and goals

Dynamics of Interpersonal Relationships

DYAD

- A dyad consists of two interacting people
- It is the simplest interpersonal dynamics
- Open person relays a message and the other listen
- It is one of the most unstable
- The interaction ends when one person of the dyad refuses listen or share his or her message

TRIAD

- A Triad consists of three interaction people.
- The members engage in and reception of thoughts and ideas
- It is more stable than the dyad as the third members may act as a mediator when there is a conflict between the other two.

GROUP

- A group consists of more than three members & is a collection of triads & dyads.
- It is the most stable form of interpersonal relationship.

Stages of Interpersonal Relationship

- Acquaintance Stage
- Development Stage
- Continuation Stage
- Deterioration Stage
- Dissolution Stage
- Termination Stage

Stages of Interpersonal Relationship

■ Acquaintance

- ❖ This is the initial stage where individuals meet for the first time.
- ❖ Communication is formal and cautious.
- ❖ People share basic information and form first impressions.
- ❖ Example: Meeting a new colleague or classmate.

Stages of Interpersonal Relationship

■ Development Stage

- ❖ Relationship begins to grow stronger.
- ❖ Increased interaction and communication.
- ❖ Sharing of personal information, interests, and feelings.
- ❖ Trust and mutual understanding start developing.

Stages of Interpersonal Relationship

■ Continuation Stage

- ❖ Relationship becomes stable and long-term.
- ❖ High level of trust, commitment, and emotional bonding.
- ❖ Open communication and mutual support exist.
- ❖ Example: Close friendship or long-term professional partnership.

Stages of Interpersonal Relationship

■ Deterioration

- ❖ Conflicts, misunderstandings, or lack of communication begin.
- ❖ Emotional distance increases.
- ❖ Trust may decline.
- ❖ Negative feelings such as frustration or dissatisfaction may arise.

Stages of Interpersonal Relationship

■ Dissolution

- ❖ Relationship weakens significantly.
- ❖ Reduced interaction and emotional attachment.
- ❖ Individuals may avoid each other.

Stages of Interpersonal Relationship

■ Termination Stage

- ❖ Final stage where the relationship officially ends.
- ❖ Can occur due to conflict, incompatibility, relocation, or personal decisions.
- ❖ Emotional closure happens

Kinds of Interpersonal Relationship

- Family
- Relationship with Friends
- Relationship with partners and spouses
- Work colleagues

Importance of Interpersonal Relationships

- **Improved Communication Skills:** Facilitates clearer expression of ideas, active listening, and understanding of others' viewpoints.
- **Conflict Resolution:** Enables effective management of disagreements, leading to reduced stress and greater harmony in personal and work environments.
- **Building Trust:** Fosters dependability, which is crucial for forming strong, stable, and secure connections.
- **Enhanced Teamwork:** Promotes collaboration, cohesion, and increased productivity within groups.
- **Emotional Support and Well-being:** Provides a sense of belonging, reduces stress, and boosts happiness.

Importance of Interpersonal Relationships

- **Career Advancement:** Strong "people skills" enhance professional reputation, leading to better opportunities and leadership potential.
- **Increased Empathy:** Helps in understanding and sharing the feelings of others, fostering better relationships.
- **Increased Self-Esteem:** Positive interactions and acceptance by others build confidence.
- **Adaptability:** Allows individuals to adjust to different situations, personalities, and environments efficiently.

Transactional Analysis

- Transactional Analysis (TA) is a psychological theory of personality and communication developed by Eric Berne in the late 1950s.
- TA explains:
 - *How people think and behave*
 - *How communication happens between individuals*
 - *Why conflicts arise*
 - *How personality develops*
 - *How relationships can be improved*
- TA is widely used in:
 - *Psychology & counseling*
 - *Education*
 - *Management & leadership*
 - *Emotional Intelligence studies*

Transactional Analysis – Ego States

According to TA, personality consists of **three Ego States**:

- Parent Ego State (P)
- Adult Ego State (A)
- Child Ego State (C)

Transactional Analysis – Ego States

- Parent Ego is the **copied behavior** from parents, teachers, elders, and authority figures.
 - *Types of Parent Ego - Critical Parent, Nurturing Parent*
- Adult Ego is the **logical and rational part** of personality.
- Child Ego State (C) is the **emotional and experiential part** of personality.

Understanding Transactions in Transactional Analysis

■ Complementary Transactions

Complementary transactions occur when the response comes from the expected ego state and communication flows smoothly. These are often productive and reduce misunderstanding.

- *Example:*
- *Adult: “What time does the meeting start?”*
- *Adult: “It starts at 10 AM.”*

Understanding Transactions in Transactional Analysis

- Complementary Transactions
- **Crossed Transactions**
- **Ulterior Transactions**

Understanding Transactions in Transactional Analysis

- Complementary Transactions
- Complementary transactions occur when the response comes from the expected ego state and communication flows smoothly. These are often productive and reduce misunderstanding.
 - *Example:*
 - *Adult: “What time does the meeting start?”*
 - *Adult: “It starts at 10 AM.”*

Understanding Transactions in Transactional Analysis

- Crossed Transactions
- Crossed transactions occur when the response comes from an unexpected ego state. This typically causes tension or a breakdown in communication.
 - *Example:*
 - *Adult: “Can you help me with this report?”*
 - *Child: “Why do you always give me extra work?”*
- Crossed transactions are common in workplaces, couples, and parent-child communication—especially when people feel stressed, judged, or emotionally unsafe.

Understanding Transactions in Transactional Analysis

- Ulterior Transactions
- Ulterior transactions contain an overt (social) message and a hidden (psychological) message. They operate on two levels and are common in manipulation, “games,” and unhealthy relationship patterns.
- Understanding ulterior patterns is especially useful in counselling and coaching when clients feel “stuck” in repeated conflicts.

Understanding Transactions in Transactional Analysis

Transactional Analysis: Complementary and Crossed Transactions

Example of a Complementary Transaction:

Example of a Crossed Transaction:

Complementary and crossed transactions happen when two ego states interact.

Understanding Transactions in Transactional Analysis

Transactional Analysis: Ulterior Transactions: Angular

Example 1:

Social Message (overt spoken words):

Salesperson (S): "This is the top of the range model."

Customer (R): "I'll take a look at it please."

Psychological Message (covert message):

Salesperson (S): "I'm not sure you can afford this...."

Customer (R): "How dare you! I'll show you I am as good as anyone else!"

Example 2:

Social Message (overt spoken words):

Friend 1 (S): "Oh no! I'm so sorry my daughter bit your son!"

Friend 2 (R): "That's OK! They're just kids."

Psychological Message (covert message):

Friend 1 (S): "I can totally understand why my daughter just bit your son - he deserved it!"

Friend 2 (R): "OMG! I am horrified by your child's behaviour! I hope he bites her back next time!"

Angular transactions involve the deployment of three ego states. According to Berne those who work in sales are the masters of these particular ulterior transactions!

JOHARI Window

JOHARI Window

- **The Open Area:** This is the part of ourselves that is known to both ourselves and others. It includes information we are comfortable sharing, such as our opinions, attitudes, and feelings.
- **The Blind Area:** This quadrant represents what others know about us but we are unaware of. For instance, it could be habits or behaviors that are evident to others but unnoticed by us.
- **The Hidden Area:** This is the opposite of the blind area—what we know about ourselves but choose not to reveal to others. It could include personal thoughts, fears, or insecurities.
- **The Unknown Area:** The most mysterious part, this quadrant contains information that neither we nor others are aware of. It may represent untapped potential, unconscious beliefs, or repressed emotions.

Empathy

- Empathy is the ability to perceive and relate to the thoughts, emotions, or experiences of others.
- Those with high levels of empathy are skilled at understanding a situation from another person's perspective and lead with compassion.

Types of Empathy

- Cognitive Empathy (understanding feelings)
 - The ability to understand another person's perspective, mental state, or point of view.
 - **Example** : A customer support executive understands why a client is frustrated about a delayed product. Even if the executive is not emotionally upset, they understand the inconvenience caused to the customer.

Types of Empathy

- Emotional Empathy (feeling what others feel)
 - The ability to feel what another person is feeling, or to have a parallel emotional response.
 - **Example** : A manager feels true happiness when a team member gets promoted and celebrates enthusiastically.

Types of Empathy

- Compassionate Empathy (taking action to help)
 - This goes beyond understanding and feeling to actually being moved to help.
 - **Example** : A team leader sees an employee struggling, understands their stress, and redistributes tasks to reduce pressure.

Importance of Empathy

- Strengthens relationships
- Reduces misunderstandings
- Improves leadership and teamwork

Social Responsibility

- Social responsibility refers to the duty or obligation of an organization or individual towards society.
- It means acting ethically and contributing to economic development while improving the quality of life of employees, community, and society.
- Often called Corporate Social Responsibility (CSR).
- Companies take responsibility beyond profit-making.

Social Responsibility

■ Examples

- *Environmental protection*
- *Charity and donations*
- *Employee welfare programs*
- *Ethical business practices*

Corporate Social Responsibility (CSR)

- Corporate social responsibility (CSR) refers to the responsibility of enterprises for their impacts on society, making companies socially accountable to themselves, stakeholders, and the public.
- Some countries have implemented mandatory CSR regulations
- India requires qualifying companies to spend 2% of average net profits on CSR activities

Corporate Social Responsibility (CSR)

Benefits of CSR

- Improved Brand Reputation
- Increased Customer Loyalty
- Better Employee Engagement
- Competitive Advantage
- Increased Profitability
- Stronger Community Relations
- Risk Management
- Environmental Sustainability

Responding to Anger

- Managing and responding effectively when someone is angry or when we feel anger.
- Causes of Anger
 - *Miscommunication*
 - *Stress*
 - *Frustration*
 - *Unmet expectations*

Responding to Anger

■ Techniques

- *Stay calm and avoid reacting immediately*
- *Practice deep breathing*
- *Listen without interrupting*
- *Acknowledge feelings*
- *Avoid aggressive language*
- *Suggest solutions*

Extremes of Anger

Responding to Anger

■ Benefits

- *Prevents conflict escalation*
- *Maintains professional image*
- *Encourages positive communication*

Handling Tough Conversation

- Managing difficult discussions such as performance issues, disagreements, or conflicts.
- Characteristics
 - *Emotionally charged*
 - *High stakes*
 - *Risk of misunderstanding*
 - *Requires emotional intelligence*

Handling Tough Conversation

- Skills Required
 - *Emotional control*
 - *Empathy*
 - *Assertiveness*
 - *Active listening*
 - *Conflict resolution*

Handling Tough Conversation

■ Steps to Handle Tough Conversations

- *Prepare in advance – Clarify the purpose and desired outcome.*
- *Choose the right time and place – Ensure privacy and minimal distractions.*
- *Stay calm and composed – Control emotions.*
- *Use clear and respectful language – Avoid blame.*
- *Listen actively – Allow the other person to express their views.*
- *Focus on the issue, not the person.*
- *Work towards a solution – Aim for mutual understanding.*

Handling Tough Conversation

■ Importance

- *Prevents misunderstandings*
- *Strengthens relationships*
- *Builds trust*
- *Improves workplace harmony*

Support

- Support involves providing emotional, informational, or practical assistance to others.
- Types of Support
 - *Emotional support (encouragement, empathy)*
 - *Informational support (guidance, advice)*
 - *Practical support (help in tasks)*

Support

■ Importance

- *Builds strong interpersonal relationships*
- *Increases motivation*
- *Enhances teamwork*
- *Reduces stress*

Negotiation

- Negotiation is a process where two or more parties discuss to reach a mutually acceptable agreement.
- Types
 - *Distributive (Win–Lose)*
 - *Integrative (Win–Win)*

Negotiation

■ Steps in Negotiation

- *Preparation*
- *Discussion*
- *Proposal*
- *Bargaining*
- *Agreement*
- *Follow-up*

Negotiation

■ Skills Required

- *Communication*
- *Persuasion*
- *Emotional intelligence*
- *Problem-solving*
- *Patience*

Negotiation

■ Importance

- *Resolves conflicts*
- *Improves cooperation*
- *Ensures mutual benefit*

Team Integration

- Team integration refers to the process of bringing team members together to work collaboratively toward common goals.
- Objectives
 - *Improve collaboration*
 - *Build trust*
 - *Enhance performance*
 - *Reduce conflicts*

Team Integration

■ Methods

- *Team-building activities*
- *Clear role definition*
- *Open communication*
- *Shared goals*
- *Regular feedback sessions*

Team Integration

■ Benefits

- *Higher productivity*
- *Better morale*
- *Strong team spirit*
- *Improved problem-solving*

Decision Making

- Decision-making is the process of choosing the best alternative among various options.
- How do teams make decisions?

Reality Testing

- Reality testing is the ability to objectively evaluate situations and verify facts before making decisions.
- Importance
 - *Avoids emotional bias*
 - *Ensures practical decisions*
 - *Improves accuracy*
- Techniques
 - *Data analysis*
 - *Fact checking*
 - *Seeking feedback*
 - *Comparing alternatives*

Problem Solving

- Problem solving is a systematic method of identifying and resolving issues.
- Possible Problems in Workplace
 - Collaborate and work with different people
 - Meet targets and deadlines
 - Work with tight budgets
 - To gain praise of supervisors
 - Work within the norms and culture of organization
 - Communication problems
 - Attitude problem
 - Poor performance
 - Discrimination/ harassment

Steps for Effective Problem Solving in the Workplace

- *Identify the problem*
- *Analyze causes*
- *Generate alternatives*
- *Evaluate alternatives*
- *Select best solution*
- *Implement solution*
- *Review outcomes*

Problem Solving

■ Importance

- *Reduces uncertainty*
- *Improves decision quality*
- *Enhances organizational effectiveness*

Impulse Control

- Impulse control is the ability to manage sudden emotional reactions and think before acting.
- Importance
 - *Prevents poor decisions*
 - *Improves professionalism*
 - *Enhances emotional intelligence*
- Techniques
 - *Pause before responding*
 - *Practice self-awareness*
 - *Consider consequences*
 - *Develop patience*
 - *Use stress management techniques*

THANK YOU
